**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Some very poor winter conditions expected at times during the afternoon and evening.

Forecast for Friday 10 Mar 2023

Weather: Most of the snow clearing away overnight, although a few snow showers continuing into the morning, mainly in the east. Bright and sunny spells developing and winds easing. Clear skies and a widespread frost in the evening.

Maximum wind: Northeast 25 gusts 35mph, decreasing North 15mph around midday.

Chance of cloud-free hill tops above 800m: 30% overnight, rising to 80% during daylight hours and evening.

Low cloud and visibility: Extensive, base 600 to 900m, soon lifting and breaking above the summits during daylight hours.

Temperature: **Valleys:** Minus 2 rising to Plus 3 Celsius around the middle of the day.
At 800m: Zero to Minus 5 Celsius
Freezing level: All levels early and later in the day, rising to around 700m early afternoon

Mountain Weather Forecast

Ground Conditions Supplement

Date: Wednesday 8 March. Location: Catstyecam summit at 12:51. Temperature: minus 5 deg C. Maximum wind speed 17.7mph. Wind chill: minus 14.1degC. Average wind speed: 14.9mph
Full report:
Another beautiful 'alpine-like' day in the lakes with cold north easterly winds dominating. The Lakeland fells are by and large snow-free, however a thin layer of snow exists on the higher fells above an altitude of roughly 750m. Ice is also present in and around drainage lines down to low elevations and the ground is well frozen above 500m. Snow distribution is quite varied with many sunny south-facing slopes almost entirely snow free, whereas shady north-facing slopes tend to have the most cover.
Despite the relatively thin snow cover overall, routes such as Swirral and Striding Edge are in winter condition and microspikes were very useful today. Further snow (potentially heavy) is forecast tomorrow with winds strengthening to gale force in the afternoon. Anyone heading out tomorrow should anticipate and be prepared for more snow and Ice than described here and potentially very challenging conditions. The windchill (feels-like) temperature was around -15ºC today and is likely to be similar or colder tomorrow.
Full winter clothing (warm and waterproof) including hats gloves, and equipment including a map, compass, and headtorch are all essential. For anyone heading above the snowline tomorrow, goggles (for navigating in challenging conditions) are strongly recommended as well as an ice axe, crampons/microspikes.
